

# FROMM

## Vendor Managed Inventory Service

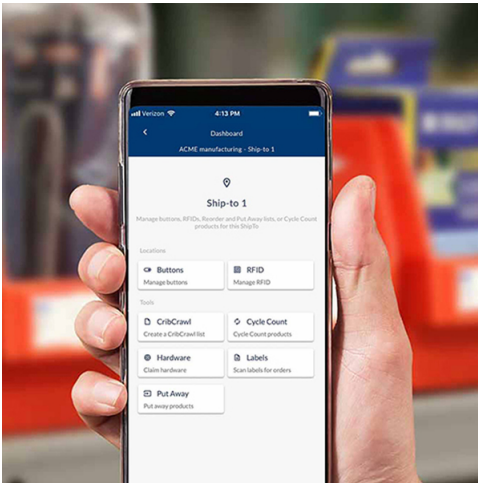

Fromm Vendor Managed Inventory service will automate and digitize your supply chain. Through our unified software/hardware platform and dedicated Inventory Service Specialists, your company will be able to reduce labor costs, optimize inventory, simplify the reordering process, and gain insight into inventory analytics.

### Improve Efficiency:

- More Control
- More Accuracy
- More Time for Other Tasks

### Reduce Costs:

- Reduce Labor
- Reduce Inventory Loss
- Reduce Stock-Outs

### Cloud-Based Software Portal

Forget juggling quotes from multiple vendors. Fromm VMI connects distributors and customers using a state-of-the-art software portal. All your data and transactions will be conveniently in one spot. Gain greater visibility and control with one site to manage inventory, vendors, and prices all in one place.

### Integrated Hardware

Reorder stock at the touch of a button. Using barcoded labels, order buttons, radio frequency identification technology, weight sensitive lockers, vending machines, and smart shelving, you will know exact locations and quantities on your warehouse floor and eliminate inventory waste before it happens.

### Expert Evaluations

We provide customized services for your specific situation. One of our specialists will visit your facility to review and document your storeroom inventory. We then analyze the information to work with you on consolidating manufacturers, reducing SKUs, organizing your storeroom, and barcoding your inventory.
